## FOREWORD

This gazetteer contains about 2,350 entries for places and features in Malta. The entries include standard names approved by the Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The basic name coverage corresponds generally to that of maps at the scale of 1:25,000. Entries include the names of populated places of all sizes, various other cultural entities, and a variety of physical features.

Most of the entities can be identified and located by the approved name or a recognizable variant of the approved name on the following source:

*Malta 1:25,000, Series M898, Directorate of Overseas Surveys, 1962-69.*

### Evaluation

Names in this gazetteer were derived principally from the 1:25,000 and 1:2,500 scale map series for Malta published by the Directorate of Overseas Surveys between 1962-69, and the *Malta Census 1967*.

The *Malta 1:25,000 Series M898* is based upon aerial photography of the 1955-59 period. Names on this series were supplied by the Office of Public Works, Malta.

Maltese is the national language, the language of the Maltese people, and the principal language of the courts of law. Both Maltese and English are official languages. Maltese has a high degree of vitality in the production of a growing literature and the trend, as far as one can observe, is toward increasing use of the Maltese language in geographic names as well as in other spheres.

Where names on official sources were found to differ, the selection of the form for approval was made according to the following order of preference:

- (1) Names in which the specific element and generic element (if any) are written in Maltese orthography;
- (2) Names in which the specific element is written in Maltese orthography and the generic element in English orthography;
- (3) Names in which the specific element and generic element (if any) are written in English orthography;
- (4) Names in which the specific element is written in Italian orthography.

In consideration of the recency and quality of the official source material, and with allowance for the varied orthographies in use in place names of Malta, the names in this gazetteer are rated as *very good*.

### Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name. — Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see". Where part of a name is underlined, the use of the part not underlined is optional. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used. Names containing generic elements preceding the specific term (except names of populated places) are alphabetized by the specific part; thus Wied Babu, the name of a ravine, is listed as Babu, Wied.

Four modified Roman letters appear in names written in Maltese orthography: ċ (C), ġ (G), ż (Z), and ħ (H). The grave accent (`) appears over a final vowel in a few names written in Italian orthography.

The following elements should begin with capital letters only at the beginning of a name: the various forms of the Maltese definite article (*il-*, *l-*, *ič-*, *id-*, *in-*, *ir-*, *is-*, *it-*, *ix-*, *iz-*, and *itž-*); the preposition *ta'*; and the preposition-article combinations (*tal-*, *tac-*, *tad-*, *tan-*, *tar-*, *tas-*, *tat-*, *tax-*, *taz-*, and *tazž-*).

Users are advised to note carefully the spacing of words in approved names. The apostrophe in the word *ta'* is followed by a space (e.g., Ta' Baldu, Ta' l-Imgħarrqa); the apostrophe in the word *sant'* is followed immediately by the first letter of the following word (e.g., Sant'Agta Church).

Designation.—The second column contains designations or abbreviations of designations of the entities to which the names apply, as listed below. Since practically all geographic terms have varied meanings, the senses in which many of the designations are applied in *this gazetteer* are stated in the list to reduce ambiguity. It should be noted also that the differentiations of terms that can be made in any gazetteer will vary with the quality of the maps of the area and with the nature of the entities that are named. In Malta some of the features do not fit precisely into the categories used to designate them and others could be designated in two or more ways.

AIRP	airport (place where aircraft regularly land and take off, with landing strips and related improvements and major facilities for the commercial handling of passengers and cargo)
AIRQ	abandoned airfield; abandoned landing field
ARCH	arch (structure in the form of an arch)
BAY	bay
BCH	beach (deposit of sand or other unconsolidated material along a shore)
BDG	bridge
BRKS	barracks
BUTE	butte (small, isolated, usually flat-topped hill with steep sides)

CAPE	cape (seaward end of a projection of land of such position and size as to affect the course of ships)
CAVE	cave (underground cavity, usually in soluble rock)
CH	chapel; church
CHNM	marine channel (channel between coastal islands, reefs, or shoals; between an offshore feature and the mainland; or through a shallow marine waterbody)
CLF	cliff(s) (high, steep rock face overlooking a lower area, such as a waterbody, coastal lowland, or valley)
CMTY	cemetery; catacombs
CNLA	aqueduct (canal or conduit used to carry water for municipal supply)
CNYN	canyon (generally short, narrow streamcourse with steep sides and steep gradient)
CONE	volcanic cone (cone-shaped elevation formed by volcanic eruption, usually with a crater or breached crater at the top)
CSNO	casino
COVE	cove
DCKB	docking basin (part of a harbor where ships dock)
FT	fort; military post; defensive lines (defensive structure or works, often of little or no present military significance; may be in a state of ruin)
GATE	gate (city gate; opening for passage in an enclosing wall or fortification)
CRTO	grotto (large cavity produced in a limestone region by the solvent action of underground streams and percolating water)
HBR	harbor(s) (body of water providing shelter for ships)
HDLD	headland (conspicuously high piece of land jutting out into or fronting the sea)
HLL	hill (landform with moderate relief, moderate to low elevation, and small summit area)
HSP	hospital
HTL	hotel
INLT	inlet (small, narrow indentation in a coast)
ISL	island
ISLS	islands

LCTY	locality (minor area or place of unspecified or mixed character and indefinite boundaries; usually involves dispersed rural settlements)	RUIN	ruin (structures in a state of ruin, but not necessarily of great antiquity or archeological interest)
LGN	lagoon (cliff-enclosed bay into which the sea reaches through a natural archway)	RVN	ravine (short, steep, v-shaped watercourse)
LT	lighthouse	SCHC	college
MESA	mesa (flat or nearly flat landform, less extensive than a plateau, separated from lower surrounding land by abrupt slopes)	SD	sound (broad, open body of marine water more or less circumscribed by islands, rocks, shoals, and/or the mainland)
MNMT	monument	SEA	sea
PAL	palace (large stately house)	SHOL	shoal (offshore hazard to navigation with a least depth of twenty meters, or ten fathoms, or less, composed of unconsolidated material)
PASS	pass (way over or between mountains or other elevated land)	SINK	sinkhole (hole, cavern, or funnel-shaped cavity made in the earth by the action of water on the soil, rock, or underlying strata)
PCLI	independent political entity	SITE	ancient site (may include ruins and ancient buildings)
PMPW	water-pumping station	SLP	slope (gradient on the side or end of an elevated relief feature; may include badly dissected slopes verging on talus)
PPL	populated place (city, town, village, settlement)	TAL	talus (sloping heap of loose rock fragments lying at the base of a cliff consisting of material which has fallen from its face)
PPLX	section of populated place (part of a city or contiguous urbanized area named as an entity but having no known administrative status)	TMPL	temple(s) (prehistoric temple partly or wholly in a state of ruin)
PRK	park	TOWR	tower
PROM	promontory, piece of an area of high, generally flat land jutting into surrounding lower land; similar to a headland except for its inland location)	UPLD	upland (broad elevated area with low or moderate surface relief)
PT	point (relatively minor projection of land into a waterbody, or its extremity)	VAL	valley (area drained by a stream, or a named segment of such an area)
RDGE	ridge (elongated, relatively narrow relief feature with a more or less continuous crest)	WAD	wadi (watercourse or drainageway that carries only occasional flows of water)
RF	reef (offshore consolidated rock hazard to navigation with a least depth of twenty meters (or ten fathoms) or less)	XRD	crossroads
RKSW	rocks in water		
RKW	rock in water (individual rock of such character and importance as to be identified by name, situated either above or below the surface of a body of water; often associated with reefs but separately named)		
RSRT	resort		
RSV	reservoir(s) (large artificially impounded body of water); tank(s) (small impoundment of water)		

Latitude and Longitude.—The third and fourth columns indicate geographic coordinates, with longitude based on Greenwich. Coordinates were generally read to the nearest minute and are for finding purposes only.

Coordinates were read at the map symbol for populated places and other entities occupying limited sites, at the mouths or lower ends of wadies, at the summits of hills, and near the centers or midpoints of other features.

Area number.—The general number 209 (Malta) in the fifth column is used throughout this gazetteer. No administrative subdivisions were known to exist at the time of publication of this gazetteer.

Glossary of generic terms

The following Maltese terms appear in the generic parts of standard names in the gazetteer. The English term or terms which correspond to each local term were applied after objective study of cartographic and other source materials, and do not necessarily reflect dictionary or other normalized usages.

dafila, daflet	cove, inlet
fliegu	marine channel
għebel ġebla	cliff, hill, rock in water
għar	cave, cove
gżejjer	island
ħagra	rock in water
hotba	hill
kalanka	cove

ponta	point
qala	bay, cove, inlet
qolla	hill, volcanic cone
qortin	hill, mesa, upland
ramla	bay, beach, cove, harbor, inlet
ras	cape, headland, point
rdum	cliff, slope, talus
sikka	reef
skoll	cliff, reef, rock(s) in water
torri	tower
wied	cove, inlet, ravine, valley, wadi

Reporting of errors

It is requested that all who use this gazetteer aid in its correction for the future printing by reporting errors and name changes to the Board on Geographic Names, Department of the Interior, Washington, D.C. 20240. A statement of the source of the correct information will be helpful.

Geographic names or their spellings do not necessarily reflect recognition of the political status of an area by the United States Government.

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200020006-9

Created in 1849, the Department of the Interior—America's Department of Natural Resources—is concerned with the management, conservation, and development of the Nation's water, wildlife, mineral, forest, and park and recreational resources. It also has major responsibilities for Indian and Territorial affairs and for standardization of Federal usage of both domestic and foreign geographic names.

As the Nation's principal conservation agency, the Department works to assure that nonrenewable resources are developed and used wisely, that park and recreational resources are conserved for the future, and that renewable resources make their full contribution to the progress, prosperity, and security of the United States—now and in the future.
